

Whether you want to comply with the regulations of an Islamic country, translate your channel into 15 different languages, version your programme for an American audience, or ingest, edit and transcode for playback, TVT builds your channels for a global audience.

Position: Filemaker Developer

Location: West London

This is an exciting opportunity to become involved in the operation, continued growth and development of a state-of –the-art post house facility. As a Filemaker developer you will play a vital role in ensuring the overall success of the business. Reporting to the Senior Engineer you will be responsible for the development and support of our database systems.

Responsibilities

- Maintenance of current database systems
- Integration of new applications with our existing Filemaker database.

Knowledge and Experience

- Approximately 3-5 yrs Filemaker experience
- Excellent general IT troubleshooting skills
- Experience with Linux and Mac based systems

Personal Skills

- Good analytical skills with a structured approach to work
- Confidant and resourceful

If you would like to be part of a dynamic team within a pioneering post-production/broadcast environment and are available for an immediate start please apply with a C.V. and cover letter to jobs@tvb.biz
